

Global Symposium for Artificial Intelligence future in Education

الندوة العالمية لمستقبل الذكاء الاصطناعي في التعليم

6th -7th December, 2023

Artificial Intelligence Arab Forum organizes the Global Symposium for AI future in Education. The potential of using artificial intelligence in education to enhance learning, assist teachers and fuel more effective individualized learning is exciting, but also a bit daunting. The ethical considerations are profound, as they are when it comes to using artificial intelligence in any type of setting. The outlines the potential of AI to help our education provide enhanced. We invite the researchers, professors, educators to participate with us in the following fields and their experiences:

- Differentiated and individualized learning
- Automation of administrative tasks
- Tutoring and support outside the classroom
- Universal access for all students
